

# Data Science Engineer Resume

Boris Dev

May 22, 2025

## Stack

- **AI:** Temporal, prompt engineering
- **Data Science:** Pandas, Sklearn, Numpy, Plotly, PySpark, DataBricks, Jupyter, SageMaker, PyTorch, GroundTruth, SQLAlchemy
- **Web BE:** FastAPI, Postgres, Mongo, Prometheus, Grafana, Splunk, ELK, OTEL
- **Cloud:** Azure, AWS
- **Pipelines:** Jenkins, Kafka

## Education

PhD in Quantitative Human Geography, at SDSU and UCSB, 2015. Data science for location referenced social science problems. Dissertation: [New Metrics for Assessing Inequality using Geographic Data](#)

## Experience

### Sindri, 2025 - current, Consultant

Built Temporal AI Agent Evaluation framework

- AI system eval workflow: expectations yaml spec -> snapshot workflow -> evaluate and report
- Prompt eval and fine-tuning workflow: faults spec -> prompt patch -> load -> batch find faults -> aggregate-score-enhance
- Developers evaluate using a cli tool (python click library)
- SME-authored executable spec file, `sme-spec.yaml` [in progress]

### Nobsmed, 2024 - current, Founder

Built LLM based website, <https://nobsmed.com/>, for users to search for biohacking experiences found in clinical studies and Reddit comments.

- ETL: Language AI parsing of 100,000 studies and 1,000,000 Reddit comments.
- Topic modeling: Extended Bertopic using LLM for naming and classification of outliers, [bertopic-easy](#).
- Customer discovery and user interviews.
- Experimented with fine-tuning opensource embeddings model and ML classification.
- Prompt engineering using InstructorAI.
- Embedding DBs for search (Weaviate, ElasticSearch).
- Worked closely with the CTO on requirements
- Built the story generation Flask API service

### Smaller consulting gigs

- The Program Labs, 2025 - Building LLM AI automation tooling and a Google Ads Experimentation platform for a non-profit accelerator that helps startups in disadvantaged communities.

- EcoR1, 2025 - Built LLM AI scraper to extract earnings calls
- Wolf Games, 2023 - Built [new graph prompting for story generation](#)
- Intuitive Systems, 2023, NED (Name Entity Disambiguation) of vendor receipts fed into AMD's sales analytic pipeline. Used LangSmith for evaluation.

### **AI Engineer consultant at SimpleLegal, 2022-2023**

SimpleLegal is a legal billing analytics company.

- Built the ground truth for a language model for an AI feature to flag invoice billing discrepancies
- Managed SMEs (subject matter experts) and 5 workers on the annotation pipeline of the training examples
- Built the inference server (SageMaker, PyTorch) and its product integration

### **Lead Analytic Endpoint Engineer at Sight Machine, 2018-2021**

Sight Machine is a manufacturing analytics company.

- Built the backend engineering on biggest public facing analytic feature
- Coordinated QA process with sales and engineering
- Built company's first distributed tracing
- Built the containerized frontend engineering development environment

### **Lead Data Engineer at HiQ Labs, 2015-2018**

HiQ Labs was a people analytics company.

- Built the scraping system and observability (Splunk)
- Led the migration from a monolith to a micro-service paradigm
- Migrated the data science team to DataBricks PySpark and microservices

### **Developer at Urban Mapping, 2011-2013**

Urban Mapping provided geospatial analytics to Tableau.

- Formulated first map rendering and query performance metrics integrated into our CI/CD pipeline

### **Impactful projects**

- Revived a stuck AI feature by shifting the team's focus from training data quantity to quality
- Reduced Tableau customer complaints by building a new observability system and CI/CD pre-commit metrics
- Reduced the data science team's firefighting by building a microservice architecture
- Built a gaming company's first murder mystery story generator by chaining to prompts to force consistency ([post](#)).

### **Papers and code**

- LLM based taxonomy (topic modeling): [bertopic-easy](#).
- [Language AI Evaluation 101: Know your user](#)
- [Langchain PR: Causal Program-aided Language \(CPAL\)](#). See Harrison Chase's [Tweet](#).
- [Work papers](#)
- [Academic papers](#)

### **Non-tech fun points**

- Climbed Cotopaxi (21,000 ft).
- Bodyboarded Mexpipe.
- Taught with students in Medellín, Columbia to make an open-source geo clustering library (ClusterPy)
- Taught kids snowboarding, as an instructor
- Managed service workers, as a restaurant assistant manager
- Counseled severely emotionally disturbed children
